

The CLEARWATER (Halogen Free)

With the design of The CLEARWATER, it was our intention to produce the best match between quality and price.

2 groups of strands with a conductor size of AWG 14.

twin-lead construction was made with 2 x 98 strands of a dense very pure silver coated Matched Crystal (MC) OFC.

The two conductor groups are twisted in opposite directions.

The resistance of each lead is: 0.9 Ohm/100 meter.

The capacitance between the two conductors is: 17.5 pF/meter.

Sonically this cable is a great product with a very balanced overall quality.

There is no harshness and the spatial reproduction is superior.

The cable's jacket is made of transparent HULLIFLEX® 3, a robust halogen free material excellently capable of shielding the copper conductors from the chemically threatening outside world.

The jacket on each lead is different in shape and the flat middle section in between has a printing on one side: both properties are easy polarity finders. Type printing at 25 cm (10") distance makes cutting of specified lengths very easy.

Cable Type:	Twin conductor
Conductor Material:	High purity dense Silver coated high purity Matched Crystal OFC
Design Purpose/	Loudspeaker cable
Application Area(s):	
Eff. Conductor Ø/Eq. AWG No./Strands:	2x(1.97 mm ² / ~AWG 14 / 98)
External Diameter /	15 mm. wide; 4.0 mm. thick
-Dimensions:	
Resistance 20 °C / 68 °F:	0.9 Ohm/100 m.
Capacitance:	17.5 pF/m.
Insulation / Dielectric Strength / Test Voltage:	HULLIFLEX® 3 / 300 Vrms min.
Connector Types Suitable:	Our 3.0 mm. Ø cable entrance diameter Bus type Universal Speaker Connectors or our 4.5 mm. Ø cable entrance diameter BERRI Bus Connectors or our DIY Screw-On Speaker Connectors; All custom mountable on ordered lengths.
Standard Sales Units / - Lengths:	100 m. reels; With connectors mounted to specifications: any length; Without connectors: please consult your van den Hul dealer or the van den Hul distributor in your country.
Jacket Colours Available:	Transparent
Remarks:	Our The CLEARTRACK is a quadruple lead / bi-wiring version of this cable; Our The GOLDWATER is a version of this cable especially suited for the more harsh (tropical) Other twin-lead speaker cables in our AWG 14 range are: The CLEARLINE, The SKYLINE HYBRID, The SNOWLINE, The BRIDGE and The GOLDWATER.
